## Internship / Working Student (m/f/d) for Machine Learning

Location Mannheim, Ladenburg

Would you like to get a glimpse behind the scenes of an international, future-focused company? Come and join us as a working student (m/f/d). In this way, you will gain valuable practical experience and perform a range of day-to-day tasks as a fully integrated member of the team while still a student. After that, we can offer some attractive prospects to get your career started.

### Your responsibilities

- Work with state-of-the-art language models, such as GPT-3.5, to develop applications and solutions that address specific challenges in the industrial domain.
- Implement and experiment with natural language processing (NLP) techniques to extract valuable insights from unstructured data.
- Develop visually appealing and informative data visualizations to facilitate decision-making processes for stakeholders.
- Participate in the training and fine-tuning of language models to enhance their performance in the context of industrial data.
- Collaborate with the research and development team to continuously improve model accuracy and efficiency.
- Document the methodologies, processes, and outcomes of analyses and model development.
- Prepare regular progress reports and present findings to the team.

### Your background

- Currently enrolled in a relevant masters program, majoring in computer science, data science, or a related field.
- Strong programming skills, preferably in languages such as Python
- Familiarity with natural language processing (NLP) and machine learning concepts.
- Experience with data analysis tools and libraries, such as Pandas, NumPy, and Matplotlib.
- Excellent problem-solving skills and the ability to learn quickly in a dynamic environment.
- Effective communication and collaboration skills.
- Strong communication skills in English are a must have.
