

Start your career with Huawei's Fresh Graduate Program

Job Title:

Solar Inverter Service Engineer (m/f/d) – Graduate Program

Job Location:

- Nuremberg, Germany – can be discussed
- Business travel in Germany may apply

Main Responsibilities:

The role of the Solar Inverter Service Engineer will be supporting the Digital Power Consulting and Integration Service department in following fields:

- Support the engineering team by supervising the entire project engineering process, conducting site surveys as well as providing installation or commissioning trainings to customers and act as the engineering partner identifying and troubleshooting technical issues that may arise during the engineering process.
- Support the pre-sales team from technical perspective by giving workshops and presentations to customers and partners on our solar products as well as possible technical issues
- Take responsibility for our technical hotline support, level 2 engineer support and the technical support service to customers and partners
- Provide onsite support in case of technical issues that cannot be solved by the customer directly or our local subcontractors and finally ensure that our quality standards onsite are met and processes are constantly improved

Requirements:

- Graduate student with Bachelor/Master's degree in Electrical Engineering, renewable energy or other engineering-related studies with focus on sustainable energy production
- First experience with solar energy market, their deployment and operation would be ideal
- Strong communication skills to internal and external stakeholders
- Strong analytical skills and target-oriented mindset

Language requirements:

- Fluent in German
- Fluent in English
